

WARNING

STORM SEASON IS HERE!

Is your home and equipment protected from lightning strikes and power surges?

Most people wait until something goes wrong before they get what they need. Unfortunately, if you wait to purchase surge protection...

IT IS TOO LATE!

Here is an inexpensive solution to protect your home and business appliances and electrical equipment.

SAVE THOUSANDS

of dollars on repairs and replacement.

SYCOM'S SYS-120/240TC

This residential Surge Protector is designed for whole house protection and any hardware application.

Many Other Applications

Applications include Commercial Use, Residential Use, Point of Use, Telecom Use and Utility Use

Did You Know:

1. The average home receives over 20 energy spikes a day.
2. A lightning strike up to one mile away can cause damage to your appliances and electrical equipment.
3. As energy demands increase, the possibility of surge damage also increases.
4. Most insurance policies do not cover lightening strikes and power surges.
5. Many insurance companies offer discounts for homes that have surge protection.
6. You can get up to 30% more life from your appliances and electrical equipment when you use surge protection.
